

ANT ENGINEERS

Problem Definition:

In civil Construction Industry Labor shortage is main problem..., and cost of lifting construction material is high,

Solution:

Ant Engineers creates low cost and quality and safety oriented lifting machine, it is mainly used in many major civil construction and builders, We can use this machine to lift construction materials up to 10 floors.

Ant builders lift machine only needs normal AC power supply, this machine is easily shift able to other place, this machine has compact architecture.

Our machine simplifies the materials lifting and decreases the stuff to labors and engineers,

Advantage's:

1. **ISO** Certified Motor's and Electrical Panels
2. Steel Gears
3. Noise Reduction
4. **24/7 Service** facility and technical support in many **major cities**
5. **Spares available any time**

- 6. Failure safe brake provide safety and security**
7. Transporting don't needs any special vehicles
- 8. 1 year service warranty**
- 9. low cost**
10. Easily Re - Shift able to other place
11. Uneducated peoples can access the machine easily
12. lifting materials easily
- 13. no need for experts**
- 14. semi automatic**
- 15. Use of tower crane is not easy and expensive**

Ant Engineers:

Ant Engineers is leading builders lift and Material handling machine provider in India, Its Established in 2006, we manufacture machines with low cost and high quality, we provide quality oriented service, customer satisfaction is our motto.

Material handling machine is used by many industries like builders, construction, cement, mining, textiles, garments and production units etc., It is used to lift the material up to 10 floors.

Machine Specification

Name	: Builders Lift & Material Handling Machine
Type	: Portable and Easy To Shift
Lifting Capacity	: Max 200 kg [up to 500 Kg for Custom need]
Motor	: 1.5 HP [Single Phase & Three Phase] ISI and ISO Certified
Gears	: Steel Gears
Machine Height	: 7.8 Feet
Machine Weight	: 287 Kg
Voltage	: 230 V AC
Brake	: Safe Failure Type
Rope Type	: Steel [6 mm or 8 mm]
Max Lifting Height	: Up to 10 floor's
